Q2: My outboard is making unusual noises. What should I do?

A2: Unusual noises are a serious issue. Consult the troubleshooting section of your manual immediately. The manual will guide you through diagnosing the source of the noise (e.g., lower unit issues, engine component wear). Q3: What type of gear oil should I use for my 1996 Yamaha 15 MSHU?

Q5: Can I perform all maintenance tasks myself?

A5: Many routine maintenance tasks, such as spark plug replacement and lubrication, are manageable for DIY enthusiasts with basic mechanical skills. However, more complex repairs (e.g., carburetor overhaul, internal engine work) should be left to qualified marine mechanics. Your manual will indicate the complexity level of each procedure.

Q6: My outboard won't start. What are the common causes?

A6: Several factors can prevent starting. The manual's troubleshooting section likely covers issues like a dead battery, faulty spark plugs, fuel delivery problems, or carburetor issues. Systematically work through the troubleshooting steps in the manual before seeking professional help.
