Printhead Cleaning and Maintenance

The printheads are the heart of your Mimaki JV3. Regular cleaning is paramount to prevent clogging and nozzle failures. The official Mimaki JV3 maintenance manual details a specific cleaning process, often involving using the printer's built-in cleaning functions and specialized cleaning solutions. However, some basic preventative measures include:

- **Regular Power Cycling:** Turn the printer off and on regularly to help prevent ink from drying in the nozzles.
- **Using the Automatic Cleaning Function:** Utilize the printer's automatic cleaning cycle at least once daily, or more frequently depending on usage.

- **Capping the Printheads:** Always ensure the printheads are properly capped when the printer is not in use to prevent ink drying.

Ink System Cleaning and Maintenance

The ink system, including the ink lines and cartridges, requires regular attention. Air bubbles or clogged ink lines can lead to print quality issues. Consult your Mimaki JV3 maintenance manual for specific procedures, but general best practices include:

- **Regular Ink Cartridge Replacement:** Use genuine Mimaki inks to maintain optimal print quality and prevent damage to the printheads. Following the recommended replacement schedule will help maintain consistent ink flow.
